Art Unit: 1615

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 42-45 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 4, 5, 6 and 8 of copending Application No. 10/407,888. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the 929 application are directed to a species of anti-epileptic compound combined with a NMDA receptor antagonist. The 888 application claims are somewhat broader in claiming the anti-epileptic compound generically at least in claim 1 and list other components in addition to a NMDA receptor antagonist to combine with the anti-epileptic compound. While the scope of the claims is different they both read on the combination of an anti-epileptic compound and a NMDA receptor antagonist. The presentation of claims of varying scope does not constitute a patentable distinction. To interchange equivalent species having the same properties in a composition would have been obvious to one of ordinary skill in the art because one would expect the desired effect to be the same.

3.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

4. Claims 46-48 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
